

Zoology; A Systematic Account of the General Structure, Habits, Instincts, and Uses of the Principal Families of the Animal Kingdom Volume 2

By William Benjamin Carpenter

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1848 edition. Excerpt: .Thus, in the Eunice, we find, at the under part, a fleshy tubercle (t), furnished with a tuft of bristles, and below it a rudimentary cirrhus, or tendril-like organ (i); whilst the upper part of the appendage is formed by a branchial tuft (f, g), and by a long slender cirrhus (c). This last sometimes exhibits a trace of articulation, as in the Syllis (Fig. 522, a). In other cases, however, these appen Fio. 522.--Sylus Monilaris, with one of its locomotive organs and setigerous appendage attached thereto. dages are only represented by a few short stiff hairs, as in the Earthworm; and in other instances, as the Leech, there is no trace of any members or appendages to the body. The bristly tufts of the Nereidans and their allies are useful to them in various ways; they serve them in part as instruments of attack...

Reviews

Merely no words to explain. I really could comprehend everything out of this published e book. I found out this publication from my dad and i suggested this publication to learn.

-- Prof. Margarita Ledner PhD

This written pdf is fantastic. It normally is not going to expense a lot of. It is extremely difficult to leave it before concluding, once you begin to read the book.
