Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 Excerpt: . . . being tested. A much more effective application of this mode of testing may be obtained by the use of the lactoscope--a simple appliance by which the absolute richness in the butter of any sample of milk can be easily determined, with sufficient accuracy for ordinary purposes. --Dr. Bond in the Farmers Gazette. PRESERVING EGGS. Commenting upon a competitive exhibition of preserved eggs, the Field says that one set was placed in a hermetically sealed tin vessel, closely soldered down, and were inaccessible to the judge. The first prize went to a lot described as packed in good, sweet bran with the thin end downwards. The eggs, when broken, proved very good, and perfectly free from the odor or taste in the white. The second prize was awarded to those rubbed with a mixture of beeswax and oil, and packed in salt. The third to a set..
