

## Geobiophysical Modeling of Phytoplankton and Nutrients

---

By Sinaya Dayan

VDM Verlag Nov 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - The global effort to monitor the water quality and productivity in the marine biosphere, regulating practices of wastewater discharge, and mitigating the environmental impact, requires extensive data collection of In-Situ measurements, a time consuming and costly option. Remote sensing provides a collection platform with field sampling by which water quality and ocean health are assessed. Coupled with GIS, these two technologies allow frequent monitoring, Geospatial analysis, and environmental modeling that predict and simulate future conditions. Two geobiophysical models are presented: terrestrial and marine. The first model identifies sources for terrestrial inputs causing the elevated levels of nutrients, which in turn increase the primary production of the marine ecosystem. The second model validates remote sensing algorithms for the detection of Chlorophyll in an oceanic setting. This is achieved by examining the relationship between In-Situ measured Chlorophyll concentrations and reflectance value. The terrestrial and the marine geobiophysical models offer an alternative approach to the common monitoring techniques as well as provide tools for sustainable development. 96 pp. Englisch.

### Reviews

*Certainly, this is actually the very best job by any author. It really is rally exciting through studying time. You may like how the blogger write this pdf.*

-- **Rudolph Jones MD**

*Completely essential go through ebook. I was able to comprehended almost everything using this created e pdf. You will not sense monotony at anytime of your time (that's what catalogs are for relating to if you request me).*

-- **Timothy Schulist**
