Envision Editions, Ltd., United States, 2015. Paperback. Book Condition: New. 226 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Grounded in biosemiotics (all levels of biological sign processes), The Isis Thesis is a transdisciplinary study of eight major ancient Egyptian texts, revealing that over 870 decoded signs, including art and architecture, communicate a unified matrix of pharaonic science, mirroring modern knowledge in microbiology, space physics, quantum physics, evolutionary genetics and black hole theory. Put simply, the Egyptian afterlife is the quantum domain, and their deities are signs for microbial genes and proteins, describing a biophysical process of horizontal gene transfer (DNA exchange between species) and radical morphogenesis for human evolution. The initial methodology included multiple reviews of the least corrupted Pyramid and Coffin Texts to categorize 108 key themes that were synthesized into 30 major idea strands, defining textual events and activities of major deities. From this analysis, a hypothetical biological model of primary signs emerged for further testing in six additional texts: Amduat, Book of Gates, Book of Two Ways, Edifice of Taharqa, Papyrus of Ani including the Theban Recension. Abductive reasoning allowed modifications to the working model with verification of Egyptian principles supported by modern scientific research. A logical, holistic matrix emerged, explaining horizontal gene transfer as an option for afterlife transformation. On the quantum level of DNA transcription, the texts depict and describe proteins binding, folding and tunneling, using modern terms and images to explain black hole/white hole formation/evaporation processes. Thus, they translate a DNA wormhole into a quantum mechanical Einstein-Rosen bridge back to the Early Universe. In this biophysical evolutionary process, the activities of Egyptian deities are signs explaining the ancient glycolysis gene expression network in our cells and the lifestyles of a complex bacterial virus that uses this ancient developmental pathway...
